

TOP TIPS FOR DISTANCE LEARNING WITH JSTOR...

With access available from home and school, JSTOR is ideal for supporting distance and classroom learning...

DISCOVER CONTENT WITH JSTOR'S FREE TOOLS

Understanding Series

Pick a text, pick a passage, and instantly see JSTOR articles that mention quoting that passage.

JSTOR Text Analyzer

Upload your own documents and the Text Analyzer will process the text and find similar content on JSTOR.

SHARE ARTICLES VIA FACEBOOK, TWITTER AND EMAIL

Each article has a 'Share' button enabling teachers to quickly and easily share specific articles with students.

EXPLORE 'JSTOR DAILY'

A free online publication that contextualizes current events with scholarship. Drawing on JSTOR's digital library, 'JSTOR Daily' stories provide historical, scientific, literary, and political background for understanding our world.

Ideal for supporting students deciding on EPQ and any research topic!

COMPLETE 'RESEARCH BASICS'

A self-paced course that helps students learn academic research skills, including effective searching, evaluating credibility, and properly citing sources.

ORGANISE RESEARCH USING 'WORKSPACE'

The 'Workspace' is a tool students and teachers can use to organise their research for articles they want to work with later.

Within the space, they can group citations using folders for different topics and projects, or just save items to the space.

They can add notes on items, delete, and move items to and from folders plus export any citation from their workspace when they're logged in.
